Carnauba Wax Wood Finish

For Hardwood, Softwood, Cork & Stone Surfaces

**Technical
Data Sheet**

**Satin 'Wear & Tear' finish coat for oiled and untreated surfaces
clear transparent, water-resistant**

- Application Range :** *indoors only:*
Use on most types of fine wood surfaces, which are previously oiled or untreated. Enhances the wood grain and increases the resistance of wood surfaces against abrasion, water and dirt penetration. Also suitable for natural stone and unglazed tiles. Easy to clean, just use a mild soap and water. Worn patches can be restored with additional coats. Do not use in frequently wet areas.
- Technical Properties :** Ideal for furniture, architectural woodwork and floors with smooth surfaces. Creates an elastic, breathable, anti-static protective coating. Water-resistant.
- Mode of Application :** Surfaces must be smooth, free of dust and clean. **Apply thin** coat by cotton cloth or wax brush, ideally parallel with the wood grain. Avoid build-ups in cavities or cracks. In such cases remove excess material, if already hardened with # 115 Xtra Mild Citrus Thinner. Let dry for 48 hours or longer (ideally 4 - 7 days), then buff to a sheen with a wax buffer or a buffing machine applying strong pressure. We recommend to buff again on the following day. Do not use floor between waxing and buffing. Use moderately and do not clean wet during the first 3 weeks.
- Coverage :** approx. 600 - 700 sqft per litre, depending on initial smoothness of surface
- Colour :** clear
- Ingredients :** Beeswax, carnauba wax, light refined linseed oil, damar varnish, Eco-House Citrus Thinner, oil of rosemary.
- Dry Time :** minimum 24 - 48 hrs. " *The longer - the harder and resistant the finish* "
- Thinning and Clean-up :** # 115 Eco-House Citrus Thinner for clean-up. Product is ready to use and does not require any thinning.
- Hints :** *For easier application the wax can be softened by warming it up in a double-boiler or by just placing the can in hot water for approx. 1/2 hour.*
Keep in mind, heating #300 Carnauba Wax Wood Finish increases the products flammability. Never heat it direct!
- Available Can Sizes :** 0.250 ltr. - 1.000 ltr. - 3.785 ltrs, larger sizes upon special request
- Shelf - life :** min. 2 - 3 years, if stored cool and dry. Reseal opened containers air-tight.
